

Happy St. Patrick's Day Week ♥

Kinsey's words on heartworms:

Keeping your cat indoors will keep them safe from predators and reduce the risk of harm of exposure to toxins and environmental hazards.

Unfortunately no matter how careful you are, you still can't prevent parasites without medicated prevention. Not only are these parasites harmful to your feline, some of these parasites can be a human health risk as well, so prevention is vital.

Revolution Plus is what we recommend as a monthly preventive; it protects against fleas, ear mites, hookworms, roundworms, ticks, and heartworms! Plus it's safe and very easy to administer. You don't have to give your pet a pill; you just apply it directly to the skin once a month.

Even if your cat is 100% indoor, we do see fleas get inside the home or even tracked in by other pets. Heartworm disease is transmitted by mosquitoes and we know how prevalent those guys are here in Texas!

We are in pest season right now and want to make sure your cat is protected. There is no treatment for heartworms, and they can be quite deadly, so prevention is key!

Right now there are reward point options for Revolution Plus that help a bit with the expense. Give us a call if you have any questions, or come pick up a box today!

Revolution Plus should be considered for every cat, every month.

Wynter's words of wisdom

Lilies and other beautiful flowers can be toxic for our kitty fur babies!

With Easter coming up it's important to know what flowers are feline safe ♥
